

FREELANCE BUSINESS CONSULTANT VACANCIES

OUR MISSION - RESULTS IN COMPLIANCE

Clients of b-fast face complex tasks in which financial processes such as treasury & capital markets, managing risks and new regulations. Our customers' ambitions are high, as is the pressure on results. That is why they need expertise in these areas, offered in a way that leads to real results. It is the strength of b-fast to bring the specialism that leads to effective collaboration between people.

CURRENT VACANCIES

If you enjoy working in a fast-paced, entrepreneurial environment, we would appreciate speaking to freelancing

1. **Risk & Compliance Consultants (senior)**
2. **Program Managers**
3. **(Implementation) Project Managers and Scrum Masters**
4. **Project Management Officers**
5. **Business Analysts**
6. **Test Managers, Coordinators and Engineers**

For all roles, except the Risk & Compliance Consultants, you preferably master a combination of project skills and compliance expertise, but this is not a showstopper.

RISK & COMPLIANCE CONSULTANTS

Each company has its own business case. The challenge for the **Risk & Compliance Consultant** is to analyse this business case, identify risks and formulate guidelines so that the company operates and continues to operate within the legal framework.

PROFILE

With your expertise within the field of Risk & Compliance you are the sparring partner for the client, you advise on complex issues and you come up with outside of the box and pragmatic solutions. With your decisive action you know how to convince your environment of the added value that you and b-fast offer.

Of course you are aware of the latest developments in the market and you are consulted for a clear view on your field of expertise. You share this vision and knowledge in a proactive way, by giving presentations, workshops, trainings and by writing articles or blogs.

Your exact role and activities depend on the assignment, but are usually in the area of:

- Covering for the compliance function (ad interim)
- Strategic and tactical advise on the compliance function
- Advising on compliance regarding MiFIDII, MAR, CSDR and other regulations
- Conducting audits and reviews within the client's organization
- Performing risk analyses on behalf of a client
- Providing compliance-related training courses
- Participate a subject matter expert in customer projects on-site, from home as well as in office
- (participate in) business requirements engineering and the writing of user stories
- Participate in functional test design, functional testing and user acceptance testing

You possess most of the following skills and qualifications:

- Bachelor or Master degree preferably in Economics, Engineering, Business, or related fields
- Domain knowledge: Banking & Financial Products and/or Energy Trading Products, Financial Trading, Risk Management, Compliance & Regulatory legislation, Market Abuse.
- Working experience in the financial industry and/or energy trading industry
- Strong Business Consultancy skills with high attention to correlations, ability to analyze and document business requirements of varying complexity
- Strong communication skills with the ability to effectively communicate with business users, project members and technical teams
- Ability to multi-task and work in a fast-paced workplace
- High quality mind-set
- Strong verbal and written English skills. German will be appreciated
- Experience with tools like: Jira, Confluence, Microsoft Office, HP QC/ALM

YOUR BACKGROUND

You have extensive and demonstrable experience in the field of Risk & Compliance. In various projects at financial service providers you have supervised or executed projects in that field.

Your specific areas of expertise are related to the compliance function, risk management and/or financial legislation and regulations. Challenges in the field of customer acceptance policy and CDD are well known to you. Specific knowledge in the field of supervising license application processes, Basel, AML, KYC, MiFIDII and MAR are a plus. You have above-average analytical and conceptual skills, are curious and critical: you do not take everything that is written for granted and go out and investigate on your own. In addition, you have extensive experience in methods and techniques, including Lean, Scrum, and Agile.

You communicate fluently at all levels and know how to tie your clients to you. You have excellent consultancy skills and you can adapt quickly and easily to changing situations and topics, while remaining focused and effective. Because of your ambition and drive you are able to motivate yourself and others to further development.

OUR OFFER

b-fast is a collective of ambitious and committed b-next and freelancing professionals aiming to achieve the best results together with and for the client. We strive for an open and professional company culture with room for creativity and own initiative. We aim to offer worldwide opportunities in the Banking and Energy domain, at b-next's customers as well as newly acquired b-fast customers. We are an equal opportunity employer and value diversity at our company.

WE'D LOVE TO HEAR FROM YOU
